Thank you for giving me the chance to review your work. Definitely, your manuscript is good and describe elaborately. Though I have some suggestions for improving your manuscript.

1. I didn't find any comparison table with the others existing work. If you add a comparison table with the other existing works, then it will be more clear.
2. Some image quality need to be improved.
3. In the reference part, try to add some recent paper like 2022, 2023.
