Potential competing interests: No potential competing interests to declare.

1. Please indicate the results at the Abstract level.
2. the keywords are very broad, please specify.
3. the introduction is very long and vast, it is necessary to specify and identify the information.
4. the method used to carry out the extraction is incorrect because it allows the bioactive molecules to be destroyed, it is necessary to use the rotary steamer (rotavapeur).
5. why did you choose wild strains and not references ?
6. he photos indicate the spreading of the stumps is very poorly done.
7. the discussion is poor in scientific information
