**Potential competing interests:** No potential competing interests to declare.

1-The paper has a short methodology (Data collection method, questionnaire, etc.).

2-The table 4 is not clear (columns 3 and 5, etc.), and the table is very long. I suggest deleting columns 3 and 5.

3- Most tables and figures need some explanation.

4-What is the difference between table 3 and table 6?

5-Very short conclusion without any comparison with other studies.

6- Not enough references in the conclusion section.
