Potential competing interests: No potential competing interests to declare.

- Some key parameters are not mentioned. The rationale for the choice of the particular set of parameters should be explained in more detail. Have the authors experimented with other sets of values? What are the sensitivities of these parameters on the results?
- The conclusion section is currently a repeat or rehash of the preceding sections and needs to be re-written to improve it, keeping in mind the following suggestions.
- Provide suggestions for future studies.
