Review comments about the manuscript entitled "Magnesium and Longevity"

Major comments

1. The aim of the study is not well described in the introduction part.
2. The keywords have been selected from the MeSH database.
3. Please describe how the authors carried out this review.
4. What were the methods for searching in article databases?
5. What were the inclusion or exclusion criteria?
6. Unfortunately, in the present study, the authors didn't explain in detail what the major challenges are in front of Mg consumption to improve aging side effects.
7. The most parts of the manuscript do not discuss Mg and longevity.
8. What are the main suggestions for future studies on animal and/or human subjects?
