**Potential competing interests:** No potential competing interests to declare.

I think they covered the basics well. However, the authors should discuss more about the latest developments in this field. For example, how genomics has impacted the study of this microorganism. How nanotechnology and modern bioinformatics have been used to gain a better understanding of the biology of this species. What are the diagnostic and prognostic challenges concerning this? How vital processes such as cell cycle and DNA replication and transcription are regulated. What is the scope of antimicrobial resistance acquired by this bacteria?
