Dear authors, I appreciate your work because the article gives insight to other authors who plan to study crime and space. The article is very interesting but, it needs some improvements to better the quality.

- 1. Abstract:** The abstract seems too long; it is recommended to rewrite whatever information is needed. In addition, the authors need to present quantitative results in the abstract.
- 2. Introduction:** The format of the introduction looks unusual, please improve it by removing the sub-section.
- 3. Method:**
 - It is better to provide a location map as a figure in the manuscript.
 - What quantitative methods are used for data analysis? Please try to explain in more detail.
 - The text on the bar chart (Figure 2-5) looks small, please enlarge the font size.
- 4. Results and discussions:**
 - The results seem unclear, please add findings that are not only qualitative but need to include quantitative ones.
 - Please add a discussion section.
- 5. References:**
 - Please correct inconsistent citations in the article. Like whether the author's name is abbreviated or not. Furthermore, I suggest to cite more recent articles.
 - Everything cited in the manuscript must appear in the reference list and use the same format.
