**Potential competing interests:** No potential competing interests to declare.

My review comments are as follows:

- Strengthen the introduction by providing a more engaging hook to capture the reader's attention.
- The authors should ensure a logical flow of information between sections.
- Include information on how certain gut microbes may impact bone metabolism and density, providing a more nuanced understanding of this relationship.
- Include information on the role of exercise, vitamin D, and other relevant factors in maintaining optimal bone health.
- Conduct a thorough proofread for grammatical errors and ensure clarity in sentence structure.
