Review of: "Pros and Cons of Key Escrow Agreements in Cloud"

Shubangini Patil

Potential competing interests: Fig. 2. Encryption Process in Clipper Chip Initiative need to explained in detail.

The paper is accepted in the present form. Cloud customers are the only ones legally responsible for protecting their customers' data that they have, so before going further in any key escrow arrangement they have to heavily check the key escrow providers. And the author need to explain the figure 2 in detail.
