Potential competing interests: No potential competing interests to declare.

1. Kindly merge section 3 in the form of a table.
2. In section 5, based on what was presented. Presented where?
3. The topic looks very lucrative, however the same doesn't get translated into the paper. Neither technical nor financial part is shown in a systematic manner. The author is advised to work on the technical part and elaborate more on the same. The financial part can be presented in a better way.
