

# Review of: "Numerical Study of Thermal Performance on Fin and Tube Heat Exchanger with Flat Rectangular and Sinusoidal Winglet Vortex Generators"

Suriya Chokphoemphun

Potential competing interests: No potential competing interests to declare.

1. Please give a definition of the words "Coarse," "Medium," and "Fine" that are presented in figure 3.
2. A number of grids equal to 0.95 million should be presented with the same significant figures as the other numbers (562707 and 858963).
3. The subfigures (a), (b), and (c) displayed in figures 4 and 5 require annotations to be added.
4. The contour scale for each subfigure (a), (b), and (c) presented in figures 4 and 5 should have the same range of values.
5. Please add a table to show the full scope of studies in this article.
6. Specify the  $Re$  of the model presented in figures 4 and 5.
7. Please add the equation numbers. All equations should be mentioned in the text.
8. Please double-check carefully for any minor errors in the manuscript.
