Challenges of Educational Support for Students with Disabilities during Covid-19 Pandemic

Thanks for the opportunity to review this article.

The following points have been given as a reviewer

1. Reasons for the student disabilities were universally known features. Some other specific causes would be explored.
2. Data analysis was given as text only. Charts and statistical figures could be an added advantage.
3. More samples could be collected for ensuring data reliability
4. Tables and classification may be done that leads to added advantage.

Overall the flow of the paper and the way it is addressing the students with disabilities was very good.

Congratulations to the author...

Regards

Rathika.S
