# Diaphragmatic defect-limb deficiency-skull defect syndrome

INSERM

## Source

*INSERM. (1999). Orphanet: an online rare disease and orphan drug data base.*

*Diaphragmatic defect-limb deficiency-skull defect syndrome. ORPHA:2141*

Diaphragmatic defect-limb deficiency-skull defect syndrome is characterized by the association of classical diaphragmatic hernia (Bochdalek type) with severe lung hypoplasia, and variable associated malformations.
