Mucinous Tubular and Spindle Cell Carcinoma of the Kidney

National Cancer Institute

Source

National Cancer Institute. *Mucinous Tubular and Spindle Cell Carcinoma of the Kidney*.

NCI Thesaurus. Code C39807.

A low grade carcinoma of the kidney characterized by the presence of tubules which are separated by mucinous stroma. Often the tubular structures have a spindle cell appearance. Patients are usually asymptomatic and occasionally they may present with hematuria or flank pain.
