Potential competing interests: No potential competing interests to declare.

I have read this "opinion piece" with great interest. I really appreciated the mention of the equality, diversity, inclusivity, and justice (EDIJ) agenda in this paper. Indeed, I believe this is central to the decolonisation debate. However, in my opinion, most of the examples given in this paper do not illustrate this well.

I have included some comments in the paper (see supplementary data), hoping that they can help you to improve your paper.

Best wishes,

Jean Macq
