FDG-Positron Emission Tomography/Computed Tomography of the Whole Body

National Cancer Institute

Source

National Cancer Institute. <u>FDG-Positron Emission Tomography/Computed Tomography</u> of the Whole Body. NCI Thesaurus. Code C137907.

Positron emission tomography combined with computed tomography of the whole body, with the use of the contrast agent fludeoxyglucose F 18 (18F-FDG) to enhance the image.
