Alaska Native

National Cancer Institute

Source

National Cancer Institute. Alaska Native. NCI Thesaurus. Code C18237.

Denotes a person having origins in any indigenous people of Alaska and their descendants and who maintains tribal affiliation, or community or cultural attachment. The concept refers to population subgroups such as Eskimos, Aleuts, Inupiat, Yupik, Alutiiq, Egegik, and Pribilofian, Alaskan Athabaskan, Tlingit, and Haida. The concept refers also to individuals who classify themselves as such.
