

# Review of: "Increasing Renewables and Building Retrofit in a Coal-Based Cogeneration District Heating System"

Bowen Li

Potential competing interests: No potential competing interests to declare.

The working conditions considered in this article are relatively comprehensive and it is a meaningful work. It is recommended to be revised and published.

The readability of the introduction part needs to be improved, and it is recommended to add a logic diagram to explain the development and other contents in the "Coal-Based Cogeneration District Heating System".
