General remarks

1. **The main issue addressed by the research is the analysis of tourist activities and their impacts on the cultural heritage of Zimbabwe.**
2. **The article is very interesting because it suggests a new kind of analysis based on citizen science.**
3. **The methodology is correct.**
4. **It is necessary to insert in the paragraph 5 Results and Discussion some figures and tables to better explain the resulting data.**
5. **It is timely to enlarge the final paragraph 6 Conclusions for a better assessment of the entire manuscript. In this way, it could be interesting to mention other similar experiences conducted in other countries worldwide.**

Specific comments

- *Add other keywords, after the abstract section.*
- *Delete the sub-heading 1.1 Tourist activities and melt its content in the paragraph 1 Introduction.*
