

Review of: "[Commentary] Polymerized Type I Collagen (Fibroquel) as a treatment for COVID-19, Mexican experience"

Navid Naghdi

Potential competing interests: No potential competing interests to declare.

As a commentary article, the authors present some manuscripts regarding a novel medical therapy used for covid 19. I suggest to the authors It's better to write the manuscript as a literature review. What are the adverse effects of polymerized type I collagen? What are the advantages of the drug compared to other medications or treatment methods?
