

# Review of: "Radiological parameters after LLIF for adjacent-level disease treatment"

J.K. Burkus<sup>1</sup>

<sup>1</sup> Hughston Clinic

**Potential competing interests:** No potential competing interests to declare.

The authors fail to describe their surgical technique: 1. Was is a circumferential fusion? Did they place posterior fixation or was this a stand-alone anterior procedure. 2. Was the LLIF surgery above or below the prior fusion surgery? Did they use expandable or lordotic cages?

They do not define Lumbar Mismatch.
