Thank you very much. The abstract and introduction seem well-written.

1-) It seems there is only one reference in the following sentence, although you have mentioned more than one study.

Results from Figure 1 and Supplementary Data 3 confirm and agree with previous studies

2-) You can add more suggestions for further studies, highlighting the novelty of your study.

3-) I am curious what the other references section is for. If the section is not necessary, you can consider removing it.

4-) If possible, you can add limitations related to your study.

5-) The sentence you provided has a minor grammatical issue. Corrected version:

"With FD-1, OD-5, and OD-7 identified as viable candidates, these studies open the door for the prospective development of effective anti-inflammatory and antioxidant medications."
