Mycosis Fungoides and Sezary Syndrome

N0 TNM Finding v7

National Cancer Institute

Source

National Cancer Institute. *Mycosis Fungoides and Sezary Syndrome N0 TNM Finding v7*.
NCI Thesaurus. Code C88237.

No clinically abnormal peripheral lymph nodes; biopsy not required. Note: for node, abnormal peripheral lymph node(s) indicates any palpable peripheral node that on physical examination is firm, irregular, clustered, fixed or 1.5 cm or larger in diameter. Node groups examined on physical examination include cervical, supraclavicular, epitrochlear, axillary, and inguinal. Central nodes, which are not generally amenable to pathologic assessment, are not currently considered in the nodal classification unless used to establish N3 histopathology. (from AJCC 7th Ed.)
