Potential competing interests: No potential competing interests to declare.

After reviewing the article "Open-Source Remote Sensing Determination of Carbon Emissions From Tropical Deforestation Scenarios in Southeast Nigeria," here are my observations:

- 1-Please explain in the introduction what the objective of this study is.
2. The Abstract should be concise and inform the readers of the background, research question, hypothesis, methodology, the main results, and conclusions.
- 3-You need to revise the language.
- 4-Please use a line graph for Figure 6, and please mention % of what in Figure 5. Please state the full form of NPA.
- 5-Please explain in the conclusion what your aim was in the study, what your findings are, and how your paper has been validly recommended.

Conclusion: Interesting and innovative work. Accept with minor corrections.
