Review of: "Beyond Traditional Teaching: The Potential of Large Language Models and Chatbots in Graduate Engineering Education"

Malliga Subramanian[1]

1 Kongu Engineering College

1. How did the authors collect the dataset?(ontology for fliud dynamics)

2. What are the limitations (unadressed area) of the proposed study?

3. The list of research questions addressed by the proposed work.

4. Not all students will have access to the necessary technology and internet connectivity to fully utilize large language models, potentially creating inequalities in educational opportunities. Comment on this.

5. What are the ethical considerations of using Chatbots for education?

6. How do you defend the challenges in integrating chatbots with existing educational systems and databases ?
