Comments to author:

This work describes SnakeChat: a conversational-AI based app for snake classification. I have the following comments to improve the work as follows:

1. The novelty of this paper was not supported in the conclusion.

2. The abstract section has to be without any abbreviations.

3. The abstract section has to be without any abbreviations; also, there are no specific results or conclusions in this section,

4. The time complexity has to consider making a decision about the efficiency of the proposed algorithm.

5. The authors have to compare this work with the recent secret encryption algorithms.
