

Review of: "Assessment of Children's Toys Suitability Index Instrument (Toy Index)"

Oluwaseun Temitope Lawal

Potential competing interests: No potential competing interests to declare.

The article is easy to understand and readable as it flows easily. However there are observations and suggestions for the author's. 1. The author's should include location (Malaysia) in the topic and delete 'Toy Index' 2. In your abstract delete 'a' before Toys and also delete toy index 3. The author should increase the keywords to five words 4. The research objectives need to be specified in the article and research questions should be in line with stated specified objectives 5. The statement of the problem should be clearly stated 6. Under 'Panel of Experts Criteria' the author should check the use of tense as the research has been implemented 7. The author should compress the research methodology 8. Lastly, what is the implication of this study for policy makers and other stakeholders in Early Childhood Education.
