Review of: "Medical Education Gone Viral During the COVID-19 Pandemic"

Anna Abarbanel¹

1. College Medical Center, Long Beach, United States

This article offers a thoughtful and encouraging look at how medical students and residents navigated the challenges of the COVID-19 pandemic with resilience and adaptability. For example, many students adjusted to virtual learning. The authors effectively highlight the mental health impact and the importance of early intervention, offering valuable insights for future educational planning.

Practical recommendations include early identification of burnout, integrating wellness programs into training, and fostering peer support networks to prevent isolation.
