Intratubular Large Cell Hyalinizing Sertoli Cell Neoplasia

National Cancer Institute

Source

National Cancer Institute. *Intratubular Large Cell Hyalinizing Sertoli Cell Neoplasia*. NCI Thesaurus. Code C162466.

A clinically benign intratubular neoplastic proliferation of large Sertoli cells in the testis. It is associated with prominent basement membrane deposits. It occurs almost exclusively in patients with Peutz-Jeghers syndrome.
