The topic of the article is very interesting. I want to learn more about the project. Hence the following comments:

Abstract:

- Expound on the successes and challenges of the project
- Include a summary of the socioeconomic impacts of the hydro-solar project

Article:

- Include an introduction about the article and the project
- Establish timelines (project start and end)

Social Impact:

- Establish the background/context of the study (community profile: population, how many households, electrification, livelihood, off-grid community? etc.)
- Describe the situation of Sitio Singawan before the establishment of the hydro-solar project
- Who among the population was benefited by the availability of electricity? Men? Women? Children? How many households were reached by the impact?
- Add a gender component in your discussion; review data again and establish the context and benefits of women from the project; the socioeconomic impacts identified are mostly related to women's unpaid domestic work, productive work, and community work.

Methodology:

- Discuss how the project was conducted

Benchmark and Needs Assessment Survey

- Discuss the results as the basis for coming up with a hydro-solar generation system
- What are the findings of the survey?

Results and Implications

- Explain how the income/revenue was generated. Did families/households pay for electricity consumption?

- Explain how the project ensured proper management and sustainability
- Explain the challenges
- What are your recommendations for next steps?
