# Review of: "Unlocking Natural Capital in the Megadiverse Colombian Pacific Basin: Navigating Challenges and Governance Gaps"

Andres Garcia-Suaza<sup>1</sup>

1. Universidad del Rosario, Colombia

This article makes a contribution to the measurement of natural capital in a megadiverse country, and particularly in a region where natural capital can play a fundamental role in economic and social development. The methodology used is well justified and described. Additionally, the results are described broadly and clearly.

This paper is in good shape for publication. It is well written and makes a contribution to the discussion of a topic that is increasing in relevance. Therefore, its publication with minor adjustments is recommended. In particular, it is recommended that further discussion be held on the possible causes of the loss of natural capital. Although it is not the main focus of the paper, it could help enhance the results.
