X-linked cerebral adrenoleukodystrophy

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. X-linked cerebral adrenoleukodystrophy. ORPHA:139396

X-linked cerebral adrenoleukodystrophy (X-CALD), a subtype of X-linked adrenoleukodystrophy (X-ALD, see this term), is a peroxisomal disease characterized by severe inflammatory demyelination in the brain, and often associated with adrenal insufficiency.
