

Review of: "Adolescents' Knowledge of Sexuality in a School Context: A Descriptive Study"

Prosper Lutala

Potential competing interests: No potential competing interests to declare.

Align the title with the aims and objectives of the study

1. The background is good, well-referenced, and has well-structured paragraphs.
2. The Methods section is comprehensive; however, the flow of the different subsections needs further strengthening. Also, some components are repeated at inappropriate locations, giving a feeling of redundancy. Data collection can start, stop, and restart. Please rewrite logically and by subsection.
3. RESULTS: The resulting narratives in this section are very long, contributing to the loss of focus for the readers.
4. Can you summarise the key results after the aim in the discussion? The discussion needs some coherence and focus.
5. In general, the manuscript may benefit from English editing for ease of flow and reading.
6. Align the title with the aims and objectives of the study
7. The background is good, well-referenced, and has well-structured paragraphs.
8. The Methods section is comprehensive; however, the flow of the different sub-sections needs further strengthening. Also, some sub-section components are repeated at inappropriate locations, giving a feeling of redundancy. Data collection can start, stop, and restart. Please rewrite logically and by sub-section.
9. The resulting narratives are very long, contributing to the loss of focus for the readers.
10. Can you summarise the key results after the aim of the discussion? The discussion needs some coherence and a good flow.
11. In general, the manuscript may benefit from English editing to ease the flow and the reading.
