Potential competing interests: No potential competing interests to declare.

The ideas presented are interesting, and the paper is well-written.

However, there are some open issues and limitations, which we list below:

- What are the main contributions of this work? They should be described in the Introduction.
- The structure of the paper must be described at the end of the Introduction section.
- The "2. Analysis of the latest research and publications" section should be changed to a literature review section and include references to the papers described.
- I suggest adding a new section, "Future Research Directions," that objectively describes and identifies future research directions.
