Review of: "A VAR Framework of Exchange Rates, Interest Rates, and Inflation Through COVID-19 in Turkey: Empirical Evidence From Linear Cointegration and Causality Analysis"

Annika Alexius[1]

1 Stockholm University, Sweden

Potential competing interests: No potential competing interests to declare.

The abstract is too long, and the English language needs editing.

The sample period could be extended, as cointegration requires a longer time span to capture long-run equilibria.

The three lags chosen in Table 4 do not appear in the results in Table 6.

The conclusions could be based more on the cointegrating vector found in the paper.
