Potential competing interests: No potential competing interests to declare.

1. Introduction: Before reference 1, kindly cite the source of information 'Although humans have a long history of environmental degradation, the effects are now being felt on a global scale due to population growth and technological advancements. It is widely accepted that we need to move towards greater sustainability.' said by who? this is a mere say.
2. Today, climate change, increasing demand for freshwater resources, declining water tables and river flows, and outdated infrastructure pose challenges to water management worldwide. [CITE THIS INFORMATION],
3. According to a report by the Water, Environment, and Health Institute, by 2030, there will be a 40% gap between water demand and available water. [CITE THIS REPORT with the page number],
4. Studies indicate that approximately 77% of Iran's land area, encompassing 23 out of 30 water basins, experiences excessive depletion of groundwater resources, with human extraction surpassing the natural recharge rate by more than threefold. [WHERE ARE THESE STUDIES? CITE MORE THAN 4],

General comments

- A. The topic is very interesting and novel.
- B. The introduction lacks citations which are current
- C. The methodology is okay.
- D. Findings will be good if the citations are updated,
- E. Conclusion should be separated from the discussion
- F. I Don't see policy recommendations,
- G. Study area / scope is lacking
- H. Limitations to the study are missing,
- I. The researcher should work on the minor errors and the paper be published.

Thank you.
