Dear Editors,

Comments on a manuscript entitled " Decoding Social Systems: Agent-Based Modeling in Understanding Tourism Dynamics, with a Case Study on Phu Quoc Island" for this journal.

There are several concerns with this manuscript. To improve the reported research, it is better to consider the following comments:

1. The English language of the manuscript is sufficient.
2. The quality of the figures is poor. Correct their quality.
3. The author(s) need to use the same pattern to write the references.
4. Use the same pattern to write the articles. The author should pay attention to the main format of the journal.
5. Author(s) need to use new references in their article, and the reference list needs to be updated.
6. The results are not clear. Discussion and conclusions need to be further explained, and in the results section, compare the methods. The most important details of the study should be mentioned.
7. In addition, authors need to write about the limitations of their article. Also, author(s) need to use new references in their article.

Final decision: Reject

Kindest Regards
