**Potential competing interests:** -It's Better Abstract of Journal Revised For Example This Sentence Repeated: Sixteen areas have been identified for the desired protection of faculty members. Fifteen areas have been identified for planned radical growth. -If used the swot analysis in methodology must be explain and further more internal and external factors that affected the performance and influence the Protection against a Toxic Environment. -Structure of article must be compare with the journal guideline. -Finding section must be separated and numbered - Questionnaire information must be transferred to methodology section - Methodology of article must be mention and total activities state in this section.

-It's Better Abstract of Journal Revised

For example, this sentence is repeated: Sixteen areas have been identified for the desired protection of faculty members. Fifteen areas have been identified for planned radical growth.

-If the SWOT analysis is used in the methodology, it must be explained, and furthermore, internal and external factors that affected the performance and influenced the protection against a toxic environment.

-The structure of the article must be compared with the journal guidelines.

-The findings section must be separated and numbered.

-Questionnaire information must be transferred to the methodology section.

-The methodology of the article must be mentioned, and the total activities stated in this section.
