

Review of: "Exploring machine learning techniques to develop predictive models to address unemployment rates in the implementation of Industry 4.0"

Celestine Iwendi¹

¹ Institute of Electrical and Electronics Engineers (IEEE)

Potential competing interests: No potential competing interests to declare.

The following should be noted and corrected accordingly:

1. How practicable is your proposed model in real-time?
2. Is it cost-efficient?
3. Grammar requires minor re-editing
4. The Introduction should contain the organisation of the study
5. The sections should be numbered for better organization
6. The author is advised to use a different referencing style for better comprehension
7. What is the future scope of the study?
8. Consider this related paper "E-Commerce Website Usability Analysis Using the Association Rule Mining and Machine Learning Algorithm" for better comprehension
