I accept this paper with minor improvements.

I have a concern about the discussion part of this paper.

My question is, is there a mismatch of references like references 25, 28, 38, 39, 44, 45, 46, 47, 48, 50, 51, 53, 54, and 55? These listed references were found in the discussion part but not in the reference part of the paper entitled "Prevalence of visual impairment and associated factors among welders in West Shewa Zone, Oromia Region, Ethiopia."
