Potential competing interests: No potential competing interests to declare.

The manuscript is well written with good English; the subject is very interesting.

However, some corrections are needed to accept the publication.

- In page 2, M. Tropicana – change it to Tropicana.
- In page 5, the title of the table, "It summarizes and descriptions of Selected case reports of eumycetoma in animals and the uses of various antifungals that have proved successfully in various animal species" -- change it to "Summary of Selected case reports of eumycetoma in animals."
- In the third column of the table, "Etiology" -- correct the names of genus and species; there are no spaces for some pathogens, and they should be in italics.

For example, *Scedosporium apiospermum* -- *Scedosporium apiospermum*

Drechslera spiciferum -- *Drechslera spiciferum*

- In page 12: Myceroma in Goats -- Mycetoma in Goats
- The references are very old; try to update them.
