Report of Manuscript entitled :

A Literature Review on the Levels of Toxic Metals/Metalloids in Meat and Meat Products in Asian Countries: Human Health Risks

The paper (Introduction, discussion, etc.) has been written in scientific terms and rational consequences. The authors successfully covered their aims to reveal the complex mechanisms by which environmental contaminants (heavy metals, chemical hazards, toxins, ... in different geographical areas) affect human health. According to my opinion, the paper is valuable and suitable for publishing.

Best regards,

Prof. Parisa Ziarati
