Dear Editor,

Thank you for the opportunity to do this review.

The recommendations are as follows:

- 1) In-text citations and references, many of which are older than five years; please, as far as possible, replace these references with ones no older than five years. Rewrite the text later.
- 2) "Temperament and Character Inventory" is older. Is it validated on the population in your country? Add some international and national studies that have applied this questionnaire. Proceed similarly to the other psychological test.
- 3) Add a "Study Limitations" section to briefly describe the limitations of the survey, the small number of study participants, and others.
