Cefamandole

National Cancer Institute

Source

National Cancer Institute. *Cefamandole*. NCI Thesaurus. Code C353.

A second-generation cephalosporin antibiotic with bactericidal activity. Cefamandole is active against *Haemophilus* and gram-negative bacilli susceptible to other cephalosporins. It is also active against many strains resistant to other cephalosporins, such as *Enterobacter* species and indole-positive *Proteus* species.
