Review of: "Forecasting by Analogy: A Parallel between the Trend of Confirmed COVID-19 Deaths in the Winters of 2022/2023 and 2023/2024 in Italy"

Farah Yasmin[1]

1 Yale University

Rehan et al. conducted a study to investigate the trends in the rates of COVID-19 deaths during the winters of two consecutive years.

The methodology is clear, and the manuscript is well-written. I have no major comments.
