

# Review of: "Development of a Mobile Application for Flag Identification based on Artificial Neural Networks"

Dr. Sagar Pande

Potential competing interests: No potential competing interests to declare.

The paper needs to be modified as per the following changes.

1. Structure of the paper is not proper. Even the references are not cited properly in sequential order.
2. Contribution of the paper needs to be highlighted in the introduction section.
3. Literature survey is very poor. Need to add more recent papers highlighting drawbacks or research gaps from those papers.
4. Diagrams need to be more clear. The resolution of the images needs to be enhanced.
5. Kindly check the guidelines of the paper submissions as the paper is not properly formatted as per the guidelines.
6. Lot of abbreviations are used in the paper it would be better if you are creating a separate table of it.
7. Novelty of the work needs to be highlighted and justified. How the proposed methodology is better than the existing systems needs to be justified.
8. Abstract: This section needs to be more modified and keywords like "I, Our, We" should be removed from the abstract.
9. Try to write a simple sentence in place of complex sentences considering appropriate grammar.
10. Conclusion should be precise.
