# Modified Overall Immune Related Response Criterion, New Non-Measurable Lesion

National Cancer Institute

## Source

National Cancer Institute. *Modified Overall Immune Related Response Criterion, New Non-Measurable Lesion*. NCI Thesaurus. Code C111083.

The finding of a growth smaller than 5 mm x 5 mm that was not present at the previous evaluation. Its presence does not indicate disease progression but precludes a determination of complete remission based on the modified overall immune related response criteria.
