

# Review of: "Discourse on the Sugar-Sweetened Beverages Tax in Indonesia: The Multistakeholder and Consumers' Perspectives"

Tanja Fatur Šikić

Potential competing interests: No potential competing interests to declare.

Article was very interesting to read however couple of things need to be improved. Literature review and main hypothesis are missing. References are mostly before 2020. Newer literature and especially data on SSB consumption are necessary. The author should focus more on the future recommendations for practical policy implications , as well as the contribution and limitations of the paper.
