The paper is generally well written and structured. However, in my opinion the paper has some shortcomings in regards to some data analyses and text.

1. The sample size in this research is quite small. It is hard to make a conclusion in such a small sample size.
2. In the paper, the authors didnot mention how to define the score of academic performance. What is the standard of the performance.
3. The age and academic disciplines seem to be useless in the analysis of the research.
