Potential competing interests: No potential competing interests to declare.

Although innovative and applicable for a scientific study, some shortcomings are noticeable. The language and writing style could be improved to make the article more engaging and accessible to a wider audience. It would be more appropriate to reduce the number of keywords. Preparing a table or visuals related to the content of the samples will help readers understand the article more easily. Overall, while the article presents an innovative concept for a scientific study, there are several areas that could be improved to enhance its clarity and credibility.
